

AAN Breeder & Maintenance Pellet Information

SUITABLE FOR PARROTS/PSITTACINES AND RACING PIGEONS

To aid in conversion to pellets and help ensure consumption levels are sufficient to maintain health, our new formulation includes a new grain base and a flavour enhancer to improve taste. A complete and balanced diet formulated to maintain vigour, fertility and general health in both breeding and non breeding birds.

The Premium Maintenance Pellets are guaranteed not to contain toxic levels of calcium, iron and other vitamin groups which may affect sensitive species.

All diets are export grade and have been gamma irradiated (sterilised) to destroy all bacteria, moulds, fungi, insects and insect eggs.

	Breeder	Maintenance
Protein	20%	15%
Fat	9.75%	3.8%
Salt	0.35%	0.3%
Fibre	4.1%	3.5%
Calcium	1%	0.6%
Phosphorous	0.5%	0.3%
Vitamin A	6250 iu per kg	5000 iu per kg
Vitamin E	325 mg per kg	250 mg per kg
Energy	3050 k/cal per kg	2920 k/cal per kg

Base Ingredients:

Rice pollard, rice hulls, soya bean & soya bean meal, wheat, sorghum, peanut & peanut meal, corn (maize) MOL blend and other cereal grains (these may change due to seasonal availability and conditions). This formulation contains a high quality and rich source of essential OMEGA 3 & 6 fatty acids.

Also contains:

- LYSINE
- METHIONINE
- METHIONINE+CYSTINE
- TRYPTOPHAN
- ISOLEUCINE
- THREONINE
- CALCIUM
- PHOSPHERUS
- VITAMIN A
- VITAMIN D3
- VITAMIN E
- VITAMIN K
- VITAMIN B2
- VITAMIN C
- VITAMIN B1
- NIACIN
- VITAMIN B6
- PANTOTHENIC ACID
- FOLIC ACID
- VITAMIN B12
- CHOLINE
- BIOTIN
- COBALT
- COPPER
- IRON
- MAGNESIUM
- ZINC
- MANGANESE
- IODINE
- CHROMIUM
- SELENIUM
- OMEGA 3 & 6 FATTY ACIDS
- DIGESTIVE ENZYMES

Directions

Sensitive species: Maintenance pellets at all times. During breeding periods you may increase Calcium and Vitamin/Mineral levels slightly by using the Premium Breeder Pellets one day per week.

Small (non-sensitive) to Medium/Large Species: Maintenance pellets during the non-breeding period for 5 days a week, fortified with Breeder pellets 2 days per week. Use breeder pellets 7/7 during breeding periods.

Large & Large Exotic Species: With extra requirements for Calcium, Vitamin and Minerals these birds will often function better on a diet of Breeder pellets for 4 days and Maintenance for 3 days. Feed Premium Breeder Pellets 7 days a week during breeding periods.

Summary: The above is to be used as a guide only and vigilant observance of your birds both during and after conversion from grain diets is essential to ensure they are consuming sufficient quantities to maintain condition and health. Feeding a variety of fruit and vegetables daily in addition to a pelleted diet is always advantageous.
